Moree's Waste Facility wins Engineering Excellence Award

Constructive Solutions and Moree Plains Shire Council were finalists in the 2009 Newcastle Division of the Engineers Australia's Engineering Excellence Awards.

At a gala event in Newcastle over the weekend Moree's new Waste Management Facility was awarded "highly commended".

Council's General Manager, David Aber said "The award recognises the quality and importance of the project design for the Facility and the community consultation that was undertaken".

Engineers Australia, Newcastle Division President, Barry Finlay said there was a record number of regional entrants and the standard of these submission demonstrates the quality and diversity of engineering performed in this area of NSW.

The Award program encourages and celebrates engineering excellence by identifying, recognising and promoting excellence in the science and practise of engineering.

The Moree Waste Management Facility sets a new standard for the handling of waste in the far west of NSW. It incorporates state of the art leachate collection systems and handling of domestic waste.

The Waste Facility was officially opened by Kevin Humphries MP on 24 April 2009.
