

Waste Management Plan

The relevant sections of this form must be completed and submitted to Council with your Development Application for demolition and / or construction works.

Completing this form requires you to identify and quantify the types of waste that will be generated during the proposed change of use as well as nominating how you intend to reuse, recycle or dispose of the excess, unwanted materials.

The information provided on the form (and on your plans) will be assessed against the objectives of the Development Control Plan. Council will request the re-submission of Waste Management Plans if there is no obvious attempt made to reuse/recycle building materials generated as by-products of development.

If you would like any assistance completing your Waste Management Plan, please contact your Council's Water and Waste Department.
